## DEMAND THE ALTERNATIVE

**Reverse the cuts, re-nationalise our utilities and public services. Private profit is not for health, education and social services**

**A statutory living wage, abolish zero hour contracts, end the wage freeze**

**Invest in building social housing, abolish the bedroom tax and place a cap on private rents**

**A higher tax on the rich and a clamp down on tax avoidance**

**Invest in creating green jobs**

**Increases to welfare and pensions should be tied to average earnings or inflation, whichever is highest**

**Stop scapegoating immigrants and those relying on social security**

**A publicly owned democratic banking system**

**End the cost of war in blood and money: No military interventions, no Trident replacement**

**Hands off our unions: support the right to strike, remove the anti-union laws and promote strong, effective collective bargaining**

**Add your name to this petition and see full details of the demonstration at:**
